Resin Bonding & Resin Veneers
sculpted to recreate nature.

Chips, small gaps, worn edges, or one tooth that never quite matched. Composite resin lets Dr. Gandhi refine your smile by adding, not removing, sculpting tooth-colored material by hand, layer by layer, so it blends with the teeth you already have.

Dr. Shiven Gandhi, DMD, FICOI
Cosmetic & Implant Dentistry · Atlanta Dental Spa

RESIN BONDING	RESIN VENEER	MATERIALS	APPROACH
$250–$550 / TOOTH	**$1,170 / TOOTH**	**EMPRESS DIRECT · ESTELITE OMEGA**	**MINIMALLY INVASIVE**

THE GANDHI APPROACH

01
Preserve what's yours
Resin bonds directly to your natural tooth, so healthy enamel is kept wherever possible. Small fixes often need little or no drilling.

02
Layer like nature
Real teeth are built from opaque dentin and translucent enamel. Dr. Gandhi layers resin shades the same way, so light passes through like a natural tooth.

03
Sculpt & polish by hand
Every edge, texture, and contour is shaped chairside, then polished to a natural luster that matches the rest of your smile.

TWO TOOLS, ONE GOAL

Bonding or resin veneer? *It depends on the tooth.*

Both use the same premium composite materials. The difference is how much of the tooth is being recreated. Dr. Gandhi will recommend the least invasive option that still gives you a result that blends with the rest of your smile. Many smiles use both.

REFINE

Resin Bonding

$250–$550 PER TOOTH

A targeted touch-up: resin is added only where the tooth needs it, to repair, reshape, or close a small space.

BEST FOR

- Small chips and worn or uneven edges
- Minor gaps between teeth
- Refining tooth shape and length
- Finishing touches after Invisalign

TRANSFORM

Resin Veneer

$1,170 PER TOOTH

The entire visible surface of the tooth is recreated in layered resin, for maximum change in color, shape, and character.

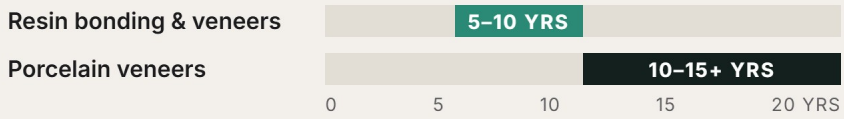

BEST FOR

- Significant discoloration that whitening can't fix
- Teeth that are severely chipped or fractured
- Maximum enhancement to match your smile
- Replacing old, stained bonding

HOW RESIN COMPARES

	RESIN BONDING	RESIN VENEER	PORCELAIN VENEER
Made by	Dr. Gandhi, chairside	Dr. Gandhi, chairside	Master ceramist
Tooth preparation	Little to none	Minimal	Minimal
Repairs & touch-ups	Easily repaired in office	Easily repaired in office	Typically replaced
Investment	$250–$550 per tooth	$1,170 per tooth	$2,500 per tooth

HOW LONG IT LASTS

Resin typically lasts 5–10 years and can be repaired or refreshed in office along the way. Porcelain often lasts 10–15 years or more. A night guard and regular cleanings help either one last.

MATERIALS & TECHNIQUE

Premium composites, *layered by hand.*

A natural result depends on the material and the hands shaping it. Dr. Gandhi chooses composites case by case, with two top choices for recreating real enamel.

OUR TOP CHOICES

IVOCLAR

Empress Direct

A refined composite with a wide family of dentin and enamel shades in varying translucencies, so color can be built up the way a natural tooth is.

TOKUYAMA

Estelite Omega

Known for its ultra-fine filler and lasting, high-gloss polish, with a natural ability to blend into the surrounding tooth.

INNER LAYER	OUTER LAYER	EDGE
Dentin shades build warmth and body	Enamel shades add brightness and depth	Translucent effects mimic a natural biting edge

YOUR VISIT, STEP BY STEP

1 Shade mapping
Your natural colors and texture are studied for a seamless match.

2 Gentle prep
The tooth is lightly prepared, often with little or no drilling.

3 Layer by layer
Thin layers of dentin and enamel shades are placed and cured.

4 Sculpt & polish
Shape and bite are refined, then polished to a natural luster.

WHEN NEEDED

Laser gingivectomy

If uneven or excess gum tissue makes teeth look short, Dr. Gandhi gently re-contours it with a laser first, so your new edges sit in a balanced gum line.

FEATURED CASE · REPAIRING BONDING ON FRACTURED TEETH

PROTECT YOUR RESULT

"Your teeth are only intended to touch while eating. Anything more is considered Para-Function."

Dr. Shiven Gandhi

- Wear your night guard if you clench or grind
- Don't bite nails, ice, pens, or open packages
- Limit coffee, tea, and red wine stains; rinse after
- Keep regular cleanings so we can re-polish

SMILE GALLERY

Small changes. *Big confidence.*

Real Atlanta Dental Spa patients, treated by Dr. Gandhi with resin bonding and resin veneers.

01

Enhancing one tooth

Front right tooth bonding removed and enhanced with a resin veneer and custom characterizations.

02

Chipped & irregular edges

Fractured edges rebuilt and shapes refined for a smooth smile line.

03

Stained margins & dark spaces

Discolored restorations replaced with fresh layered resin.

04

Enhancing Small Lateral Teeth

Peg Laterals made larger with Resin Veneers

05

Lateral Incisors Enhanced

lateral teeth lightly prepared and enhanced with resin veneers.

INVESTMENT

Clear pricing, *tooth by tooth.*

Invest exactly where your smile needs it. Your plan lists every tooth and its fee before treatment begins.

REFINE

Resin Bonding

$250–$550

PER TOOTH

Each tooth's fee is set by how much resin artistry it needs.

- The size of the area and number of surfaces rebuilt
- The layering detail needed to match your natural teeth

TRANSFORM

Resin Veneer

$1,170

PER TOOTH

One fee per tooth for a fully layered resin veneer, sculpted and polished chairside.

$2,340	$4,680	$7,020
2 TEETH	4 TEETH	6 TEETH

Fees shown are for Dr. Gandhi's resin treatment. Laser gingivectomy is added to your plan only where needed to balance the gum line. Your exact plan and total are confirmed in writing before treatment.

YOUR CONSULTATION

1
Evaluation
A thorough look at your teeth, gums, and bite with Dr. Gandhi.

2
Photos & shades
Smile photos and shade mapping to plan a seamless match.

3
Your goals
We talk through what bothers you and the look you want.

4
Your plan
Bonding, resin veneers, or both, tooth by tooth, with your fees.
